NOTES:

All of the strategies below were submitted by students, using the Strategy Factory process

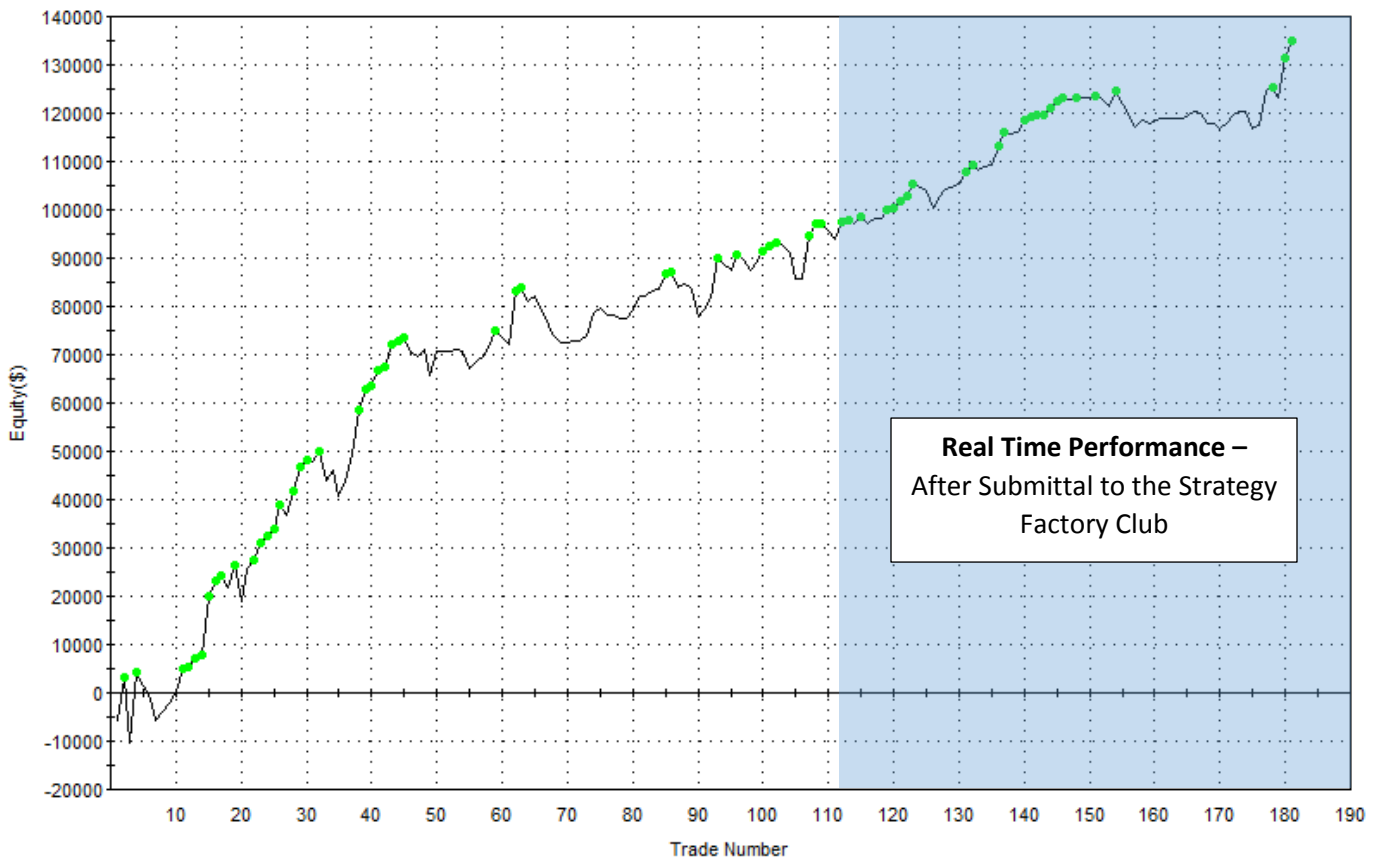

Not every strategy submitted to the Strategy Factory Club passes the 6 month live performance test (it is a hard test to pass!)

Not every strategy that passes the 6 month live performance test continues to perform well (I always plan on strategies having a limited life)

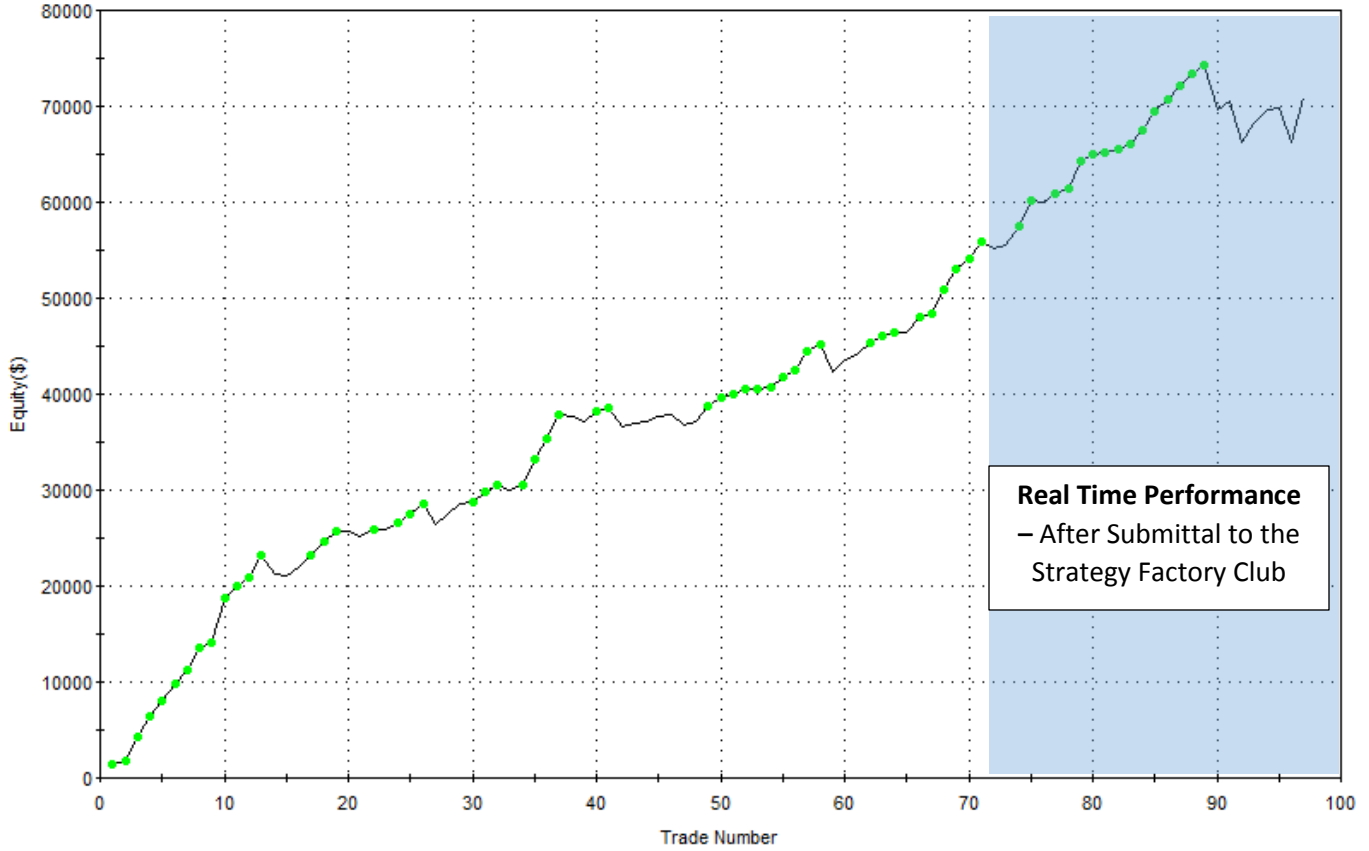

Strategies shown below passed the 6 month performance test, and have continued to perform well

Always, always, always – treat results as hypothetical

So you get the idea... every month, about 15-25 properly developed strategies are submitted by student traders of the Strategy Factory workshop. Many of the strategies go on to pass a 6 month LIVE evaluation that I monitor.

This program is a great way to quickly increase your library of strategies!
